Figure 1 consists of 12 histograms arranged in a single column. Each histogram represents the distribution of the number of non-zero elements in the vector  $x$  for a specific value of  $n$ , ranging from 1 to 12. The x-axis for all histograms is labeled 'Number of non-zero elements' and ranges from 0 to 12. The y-axis is labeled 'Frequency' and ranges from 0 to 10. The histograms show that as  $n$  increases, the distribution of non-zero elements shifts to the right, with the peak frequency moving from 1 non-zero element at  $n=1$  to 12 non-zero elements at  $n=12$ .
